

WINDBOX II NX

Ultra-flat industrial PC for digital signage, edge computing and automation

The WINDBOX II NX is an ultra-compact and fanless industrial PC that has been specially developed for demanding applications in the fields of digital signage, industrial automation, kiosk systems and edge computing. Equipped with an Intel® N150 processor, the system impresses with its high energy efficiency and reliable performance in 24/7 continuous operation. The housing, which is only 19 mm flat, enables particularly space-saving integration - for example behind displays or in compact industrial environments.
