

BRICK J3455E

Ultra low-power industrial PC

The BRICK J3455E is a compact and energy-efficient industrial PC with fanless cooling and an extended temperature range. In combination with a large number of interfaces (including six COM ports), the system is ideal for industrial applications such as machine control, data acquisition or use in control cabinets.

Equipped with an Intel® Celeron J3455E CPU with 4x1.50 GHz and up to 8 GB DDR3 RAM, the mini PC offers reliable performance with a maximum power consumption of 40 watts. The robust metal housing and passive cooling enable stable and maintenance-free operation even under demanding conditions.
